

# Battery Watering Carts

## Cordless Watering Carts for use with World's #1 Battery Watering Gun

### Water where you want it, when you want it

Philadelphia Scientific Watering Carts bring unsurpassed flexibility and convenience to your battery watering operation and are the ideal complement to our Battery Watering Guns. With no need for an electric supply, these two cordless Battery Watering Carts are the perfect solution to the following workplace challenges:

- When the charging area doesn't have a suitable water supply
- When available pure water is in unpressurized containers like bottles or storage tanks
- When you don't want long hoses trailing across the floor
- When battery locations are scattered throughout the facility
- When batteries are used in cold storage operations where a static water supply would freeze
- When a facility has water pressure problems

Philadelphia Scientific's Battery Watering Carts combine transportability and convenience to provide a cost-effective water supply — wherever you need it.

### HYDROFILL Watering Cart — CRT-12V

**10 gallon capacity** – Sturdy polypropylene tank with large cap for easy filling. Fill with tap water, bottled water or from our PS-300 Deionizer Unit.

**Compact size** – Easy to transport. 2-wheel configuration allows for easy maneuverability up stairs and ramps.

**Easy to use** – Turns ON when you squeeze the Water Gun trigger. Turns OFF when the gun shuts off.

**Battery included** – Built-in 12-volt, sealed rechargeable battery.

**Plug-in charger** – Battery charger plugs into a 110/120 VAC wall outlet and into the cart (220/240 VAC available). Charger shuts off when battery reaches full charge.

**Compatible** – Can be used with all Philadelphia Scientific Watering Guns and Deionizer products. Not compatible with Water Injector Systems.

### Pressure Tank Watering Cart — CRT-10G

**10 gallon capacity** – When tank is pressurized to 80 psi.

**Capacity gauge** – Indicates how full the tank is.

**Sturdy construction** – Heavy duty steel tank holds rubber bladder used to store water under pressure. Cart rolls on 8-inch ball bearing wheels.

**No battery or electricity required** – Uses your building's water pressure to deliver water wherever you need it. An optional Booster Pump is available if your building has very low water pressure or if you want to use bottled water.

**Cart includes** – 9-foot input hose, 10-foot output hose and quick-connect to your building's water supply.

**Compatible** – Works with all Philadelphia Scientific Watering Guns and Deionizer products.

#### Product Specifications: Part ID: CRT-12V

<b>Height</b>	37 inches	94.0 centimeters
<b>Width</b>	17 inches	43.2 centimeters
<b>Depth</b>	17 inches	43.2 centimeters
<b>Weight</b>	30 pounds	13.6 kilograms
<b>Hose Length</b>	9 feet	2.7 meters
<b>Capacity</b>	10 gallons	37.9 liters

#### Product Specifications: Part ID: CRT-10G

<b>Height</b>	41 inches	104.1 centimeters
<b>Length</b>	19 inches	48.3 centimeters
<b>Width</b>	17 inches	43.2 centimeters
<b>Weight</b>	57 pounds	25.7 kilograms
<b>Hose Length</b>		
Input	9 feet	2.7 meters
Output	10 feet	3.0 meters
<b>Capacity</b>	10 gallons	37.9 liters
